

Understanding Pad Compounds

Black Pad

Used on iron or steel rotors; rotor friendly will extend pad life. Very good stopping power and has a lower fade resistance at low to medium temperatures. Recommended for use as a low cost all purpose brake pad for Late Models, Limited Late Models, IMCA style Modifieds, N.E. Big and Small block Modifieds, Sprint Cars and Street Stock

Medium Pad

Used on iron or steel rotors; rotor friendly will extend pad life. Offers drivers a very consistent feel through entire operating range.

DTC-30 - Brake pads for all dirt track applications.

Late Models, Limited Late Models, IMCA style Modifieds, N.E. Big and Small block Modifieds, Sprint Cars and Street Stock
