

KSE-2000010M

Dual Filter Power Steering Fluid Reservoir

KSE's Dual Filter Power Steering Fluid Reservoir is manufactured from high quality, billet aluminum with a sleek, cooling fin design for superior fluid cooling and overall system performance. The unique design utilizes removable screen filters to help protect pumps and steering system components from contamination and debris. The updated design now includes an integral mounting system with standard firewall mounting bracket with optional tube mounting kits available - clean, simple installation with no hose clamps!
